

Dietary Restaurant Finder

By Alex Weber

The Problem

- Hard to find dietary-friendly restaurants
- Information is inconsistent
- Time-consuming research

Why This Matters

- Health & safety concerns
- Cultural/religious needs
- Lack of centralized info

The Solution

- Filter restaurants by dietary needs
- AI-powered summaries
- Personalized experience

Key Features

- User login
- Dietary filters
- Favorites system
- AI summaries

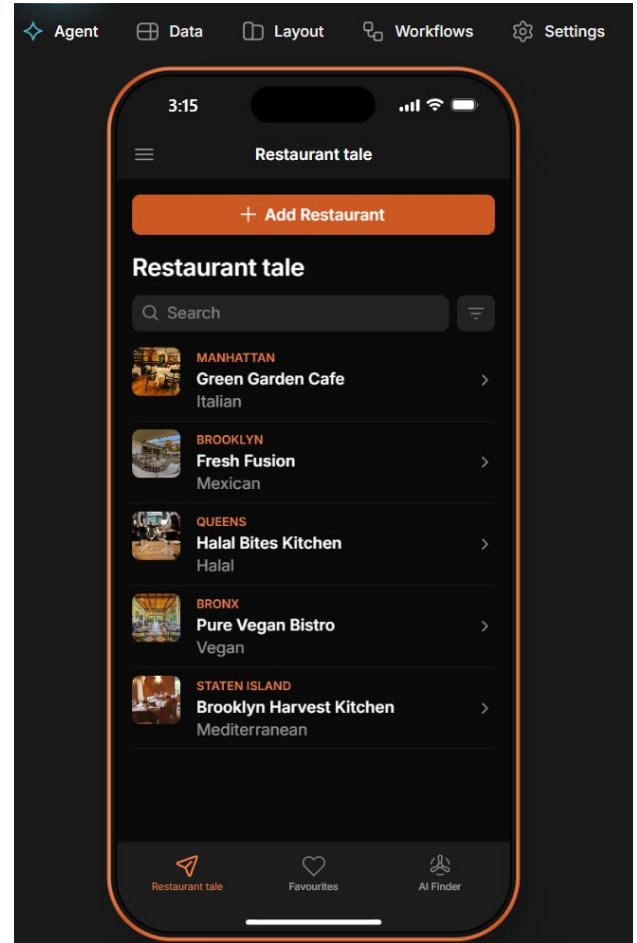

Live Demo

- Login
- Apply filters
- View restaurant
- Save favorite

<https://dietary-finder-ny8x.glide.page>

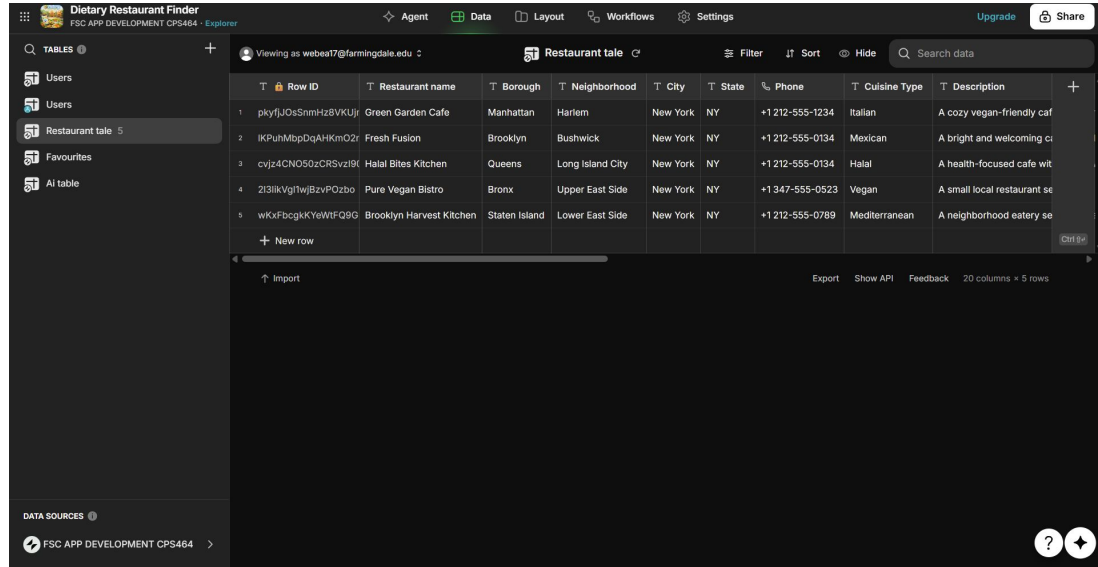

Frontend Design

- Responsive UI
- 3 main pages
- Easy navigation

Backend & Logic

- Authentication
- Filter processing
- Data handling

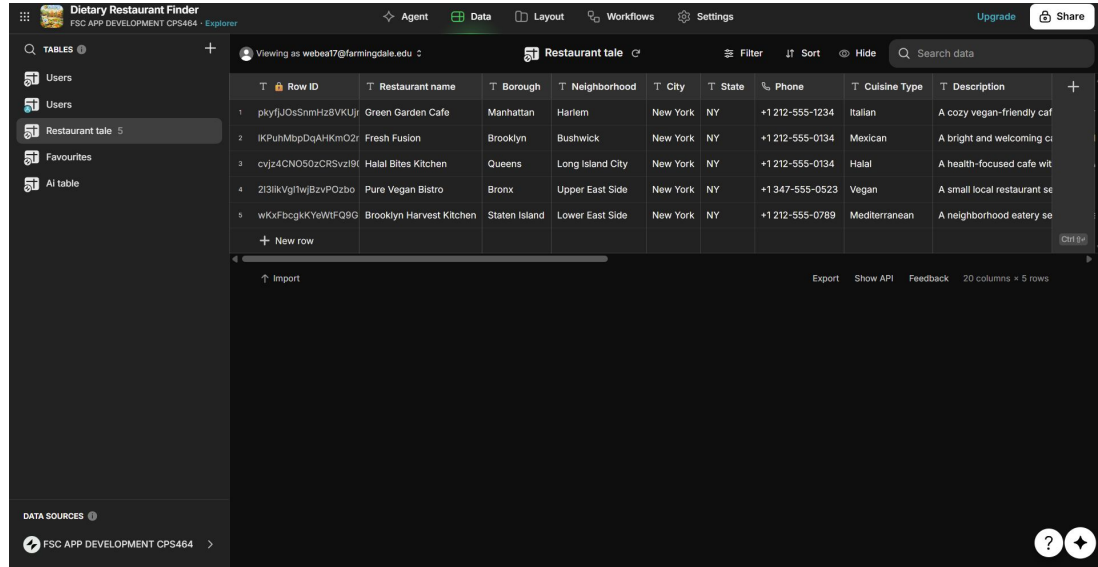

The screenshot displays the 'Dietary Restaurant Finder' application. The interface includes a sidebar with navigation options: 'Users', 'Restaurant tale 5', 'Favourites', and 'AI table'. The main area shows a table titled 'Restaurant tale' with columns: Row ID, Restaurant name, Borough, Neighborhood, City, State, Phone, Cuisine Type, and Description. The table contains five rows of data. Below the table, there are buttons for 'Import', 'Export', 'Show API', 'Feedback', and '20 columns x 5 rows'. The bottom status bar indicates 'FSC APP DEVELOPMENT CPS464'.

Row ID	Restaurant name	Borough	Neighborhood	City	State	Phone	Cuisine Type	Description
1	Green Garden Cafe	Manhattan	Harlem	New York	NY	+1 212-555-1234	Italian	A cozy vegan-friendly caf
2	Fresh Fusion	Brooklyn	Bushwick	New York	NY	+1 212-555-0134	Mexican	A bright and welcoming ci
3	Halal Bites Kitchen	Queens	Long Island City	New York	NY	+1 212-555-0134	Halal	A health-focused cafe wit
4	Pure Vegan Bistro	Bronx	Upper East Side	New York	NY	+1 347-555-0523	Vegan	A small local restaurant se
5	Brooklyn Harvest Kitchen	Staten Island	Lower East Side	New York	NY	+1 212-555-0789	Mediterranean	A neighborhood eatery se

Database Structure

- Users
- Restaurants
- Favorites
- CRUD operations

AI Integration

- Analyzes descriptions
- Generates summaries
- Improves decisions

Why AI

- Simplifies complex data
- Faster decisions
- Adds value

Security

- Authentication
- Protected routes
- Input validation

 Made with *Glide*

Responsible AI

- No guarantees
- Privacy respected
- Bias acknowledged

Challenges

- Data limitations
- AI accuracy
- Security implementation

What I Learned

- AI development
- Full-stack systems
- Security importance

Conclusion

- Real-world impact
- AI-powered solution
- Scalable idea
